Sprint 2.0. 17 July, 2017
Document Revision v1.0 17 July, 2017

Team 5
CMPS115-01
Dan Suh, Hyejin Lee, Minkyu Yun, Seungchyul Shin, Sunjae Lee

Action to Stop Doing:

Our team should stop having one person do most of the work. Dan usually finishes his work quickly and does other member's work because it's faster. However, we have agreed that it'd be better if he could wait (or teach) other members to do their own work so that they can learn. Our team should stop having scrums both on saturday and sunday because members need a rest at least one day a week.

Actions to Start Doing:

Our team should plan in detail first before start coding.
Our team should have a coding standard so that it's easier to integrate.

Actions to Keep Doing:

Following the burn-up chart's ideal work time plan
Track current process using trello
Have more unofficial meetings/discussions other than scrum so that issues can be resolved more quickly
